That's Gentug Textile.

We are playing a leading role in the rapidly growing technical textile industry with our wide range of products...

“Our extensive range of medical textile products and years of experience help us maintain our position as a global partner in medical industry.”

Gentug Textile is the leading technical textile manufacturer in Turkey, currently providing high quality products to a worldwide market.

Established in 1917 Gentug Textile entered into the technical textile business in 1987 by acting as representatives to established industry leading groups within the Woven and Nonwoven Interlining sector.

As a result of constantly updating and changing to suit current market conditions and by investing in new technology. We have been able to play a leading role in a rapidly expanding Technical Textile Industry with our extensive range of products.

Being a manufacturer of various types of technical textile products, we are well aware and more than capable of answering all the needs of an ever changing marketplace. Providing the perfect quality, with a quick and efficient operation.

We can also supply tailored solutions to any project that requires innovation and creativity; with continuous development in mind we look forward to a busy future.

+ EASYWIPE FALL PROTECTION 3 FOLD BED SIDE MAT

The Easywipe Fall Protection 3 Fold Bed Side Mat by Caretex provides quick and simple bedside safety for individuals at risk of falling out of bed.

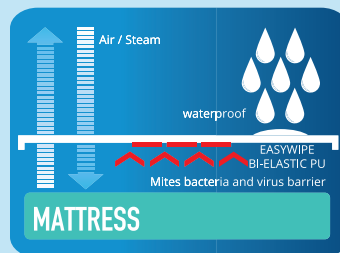

When the mat is not needed, it conveniently folds for easy storage.

Made of a high density foam padding, the 3 Fold Bed Side Mat will absorb the impact from bed falls and help prevent injuries.

The non-skid bottom reduces the chance of the mat from slipping and the durable PU cover makes the mat easy to clean. Caretex Bed Side Mat combines safety with convenience for anyone at risk of falling out of bed.

Features

- Comes with durable PU cover that is easy to clean
- Conveniently folds into 3 sections for storage
- Designed to reduce injuries from bed falls
- Made of high density foam to absorb impact from bed falls
- Non-skid bottom reduces chance of mat from slipping

EVAC SHEET, FAST & SAFE PATIENT EVACUATION

The rescue sheet, which is always in place between the mattress and the bed, guarantees fast and safe evacuation of bedridden patients in case of fire or other danger. A single person is all that is needed to evacuate a patient. The rescuer simply grabs the handles and pulls the patient to safety.

Always use Caretex Rescue Sheet between the mattress and bed. It's a guarantee for quick evacuations of patients in case of fire or other danger.

The Caretex Rescue Sheet has an extra long handle at each short end that allows personnel to evacuate with their back straight, reducing the physical strain.

PRODUCT INFORMATION

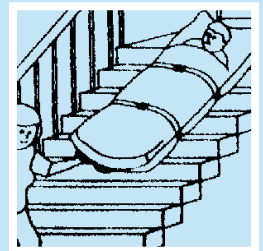

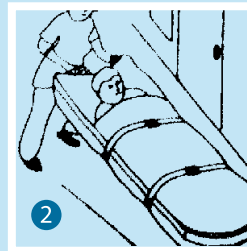

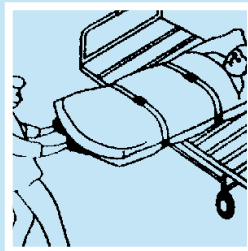

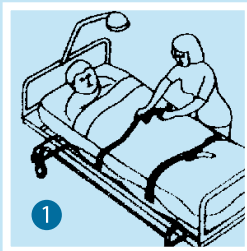

- Does not interfere with daily bed making.
- Glides easily on both wet and dry surfaces.
- Strong handles to pull.
- Handles for moving laterally and for daily handling of the mattress.
- Safety straps secure the patient during the evacuation.
- Does not discolour hygiene mattresses.
- Flame resistant in accordance with BS 7175.

+ EVAC SHEET

INSTRUCTIONS TO USE

The Evac Sheet must be placed in between the mattress and the bed. ¹Fasten the safety straps around the patient. The safety straps firmly secure the patient during evacuation. ²Grasp the handle at the foot of the bed and turn the mattress around 90. Slide patient down on the floor and pull the patient to the gathering point. Keeps your back straight while pulling the patient to the safety. Throughout the evacuation process patient should be pulled with the feet first both when on floor and going down the stairs to minimize the risk of injury to the patient. The long handles on both end of the mattress allow the personnel to hold a healthy posture reducing the risk of back injuries while evacuating the patient. The side handles help the personnel to lift the mattress and move it horizontally.

“An ideal protection for patients who suffer light incontinence”

ABSØ BEDPADS & DRAW SHEETS

BREATHABLE

LIQUIDPROOF

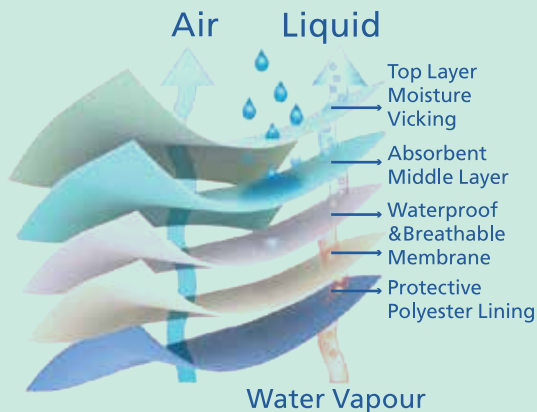

ABSORBENT

“In addition to hospitals, underpads and draw sheets are also perfect for households, nursing homes and baby/day nurseries.”

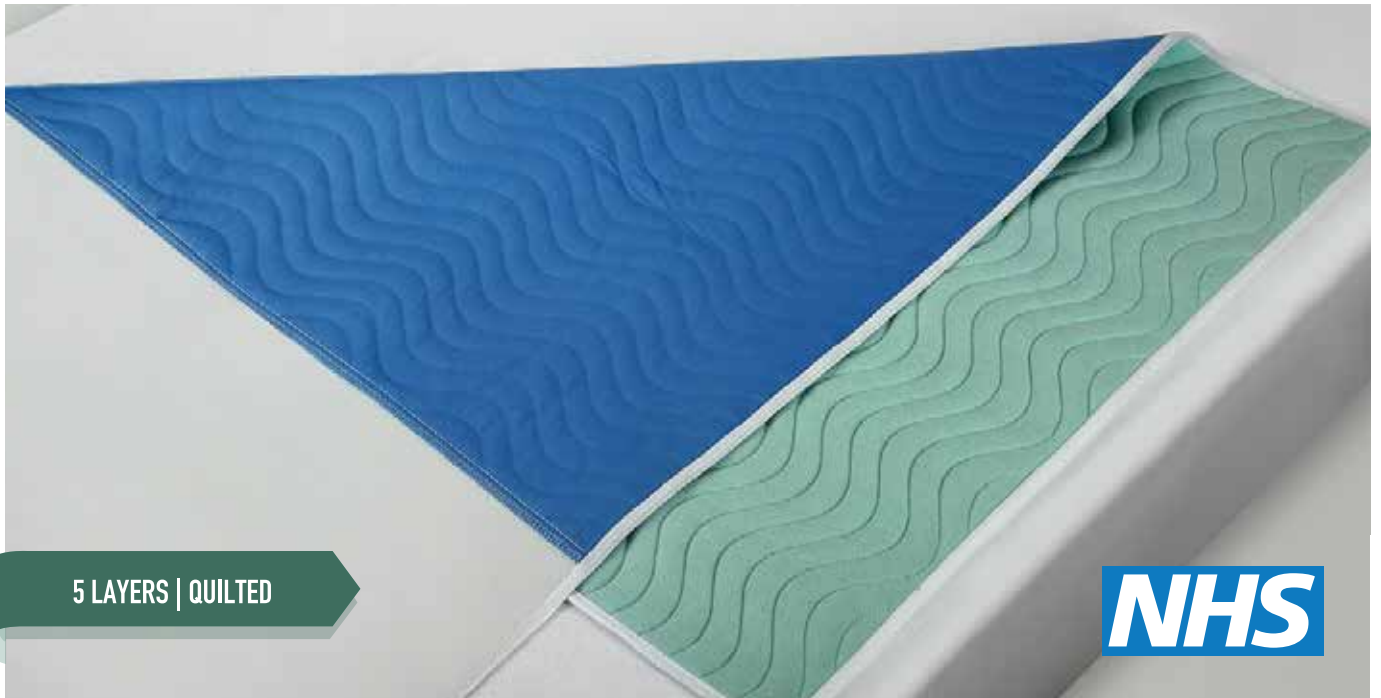

Millions of people suffer from incontinence regardless of age and gender. Urinary incontinence is a very common and commonly-treatable disorder affecting millions of men, women and children in the world every year.

Gentug bedpads and drawsheets are designed for different incontinence types with variable absorbency levels. There is no fit-to-all product for incontinence, choosing the right product will make your life easier.

Where to use ABSØ

- 3 Children with bed wetting problems
- 3 Maternity Care- Baby Care
- 3 Rest homes, Hotels, Schools, Pre-schools
- 3 Ideal for bedridden patients
- 3 Suitable for laundry use
- 3 Incubator, cradle, child bed and standard bed sizes are available

+ ABSO

ABSO is a Reusable Underpad containing 5 functional layers laminated to each other. The top layer of ABSO is made of highly technical yarns that transfer the unwanted liquid to below layers very quickly, leaving the top layer dry within a few minutes so that the person lying on it does not feel uncomfortable. The liquid is locked between the below layers and the penetration to the mattress is avoided. Breathable PU Membrane and fully laminated layers prevent decubitus wounds. ABSO is recommended for home/industrial use in cases of heavy incontinence protecting both patient and the mattress.

Protects both patient and bed!

- Washable and Reusable
- 100% Waterproof with Multi-layer Protection
- Prevents Decubitus

SAFETY INFORMATION FOR TRANSFER AIDS.

Visual check:
Confirm that the material and seams are not damaged. Make sure that the material is not worn or bleached.

Mechanical load or pressure:
Apply pressure to the handles and make sure that the seams will not burst and the handles will not break under heavy loads.

Stability check:
Carefully bend the fabric to verify that is elastic but still feels stable and solid.

Friction check:
Low friction - Make sure that the surface is smooth. Ironing satin product will affect sliding properties negatively. Compare with a new product.

High friction - Make sure that the surface is rough and restricts the movements of transfer aids. Compare with a new product.

- ABSO SLIDE SET is the perfect combination of ABSO SLIDE & CARESS SLIDE to help moving or transferring the patient from one bed to another
- The first layer of ABSO SLIDE is made of highly technical yarns that transfer the unwanted liquid to below layers very quickly and dries in a few minutes so that the person lying on it does not feel wet.
- Later the liquid is locked between the below layers and the penetration to the mattress is avoided.
- Breathable PU Membrane and fully laminated layers prevent decubitus wounds.
- With heavy duty handles sawn on both sides ABSO SLIDE is a great help for moving and positioning the patients with ease and safety.
- Caress SLIDE is a must be used with Abso Slide together for maximum benefit and protection.
- The skirts are laminated with waterproof and breathable PU Membrane for complete protection.
- Abso Slide must be on top for maximum incontinence protection and positioning aid.

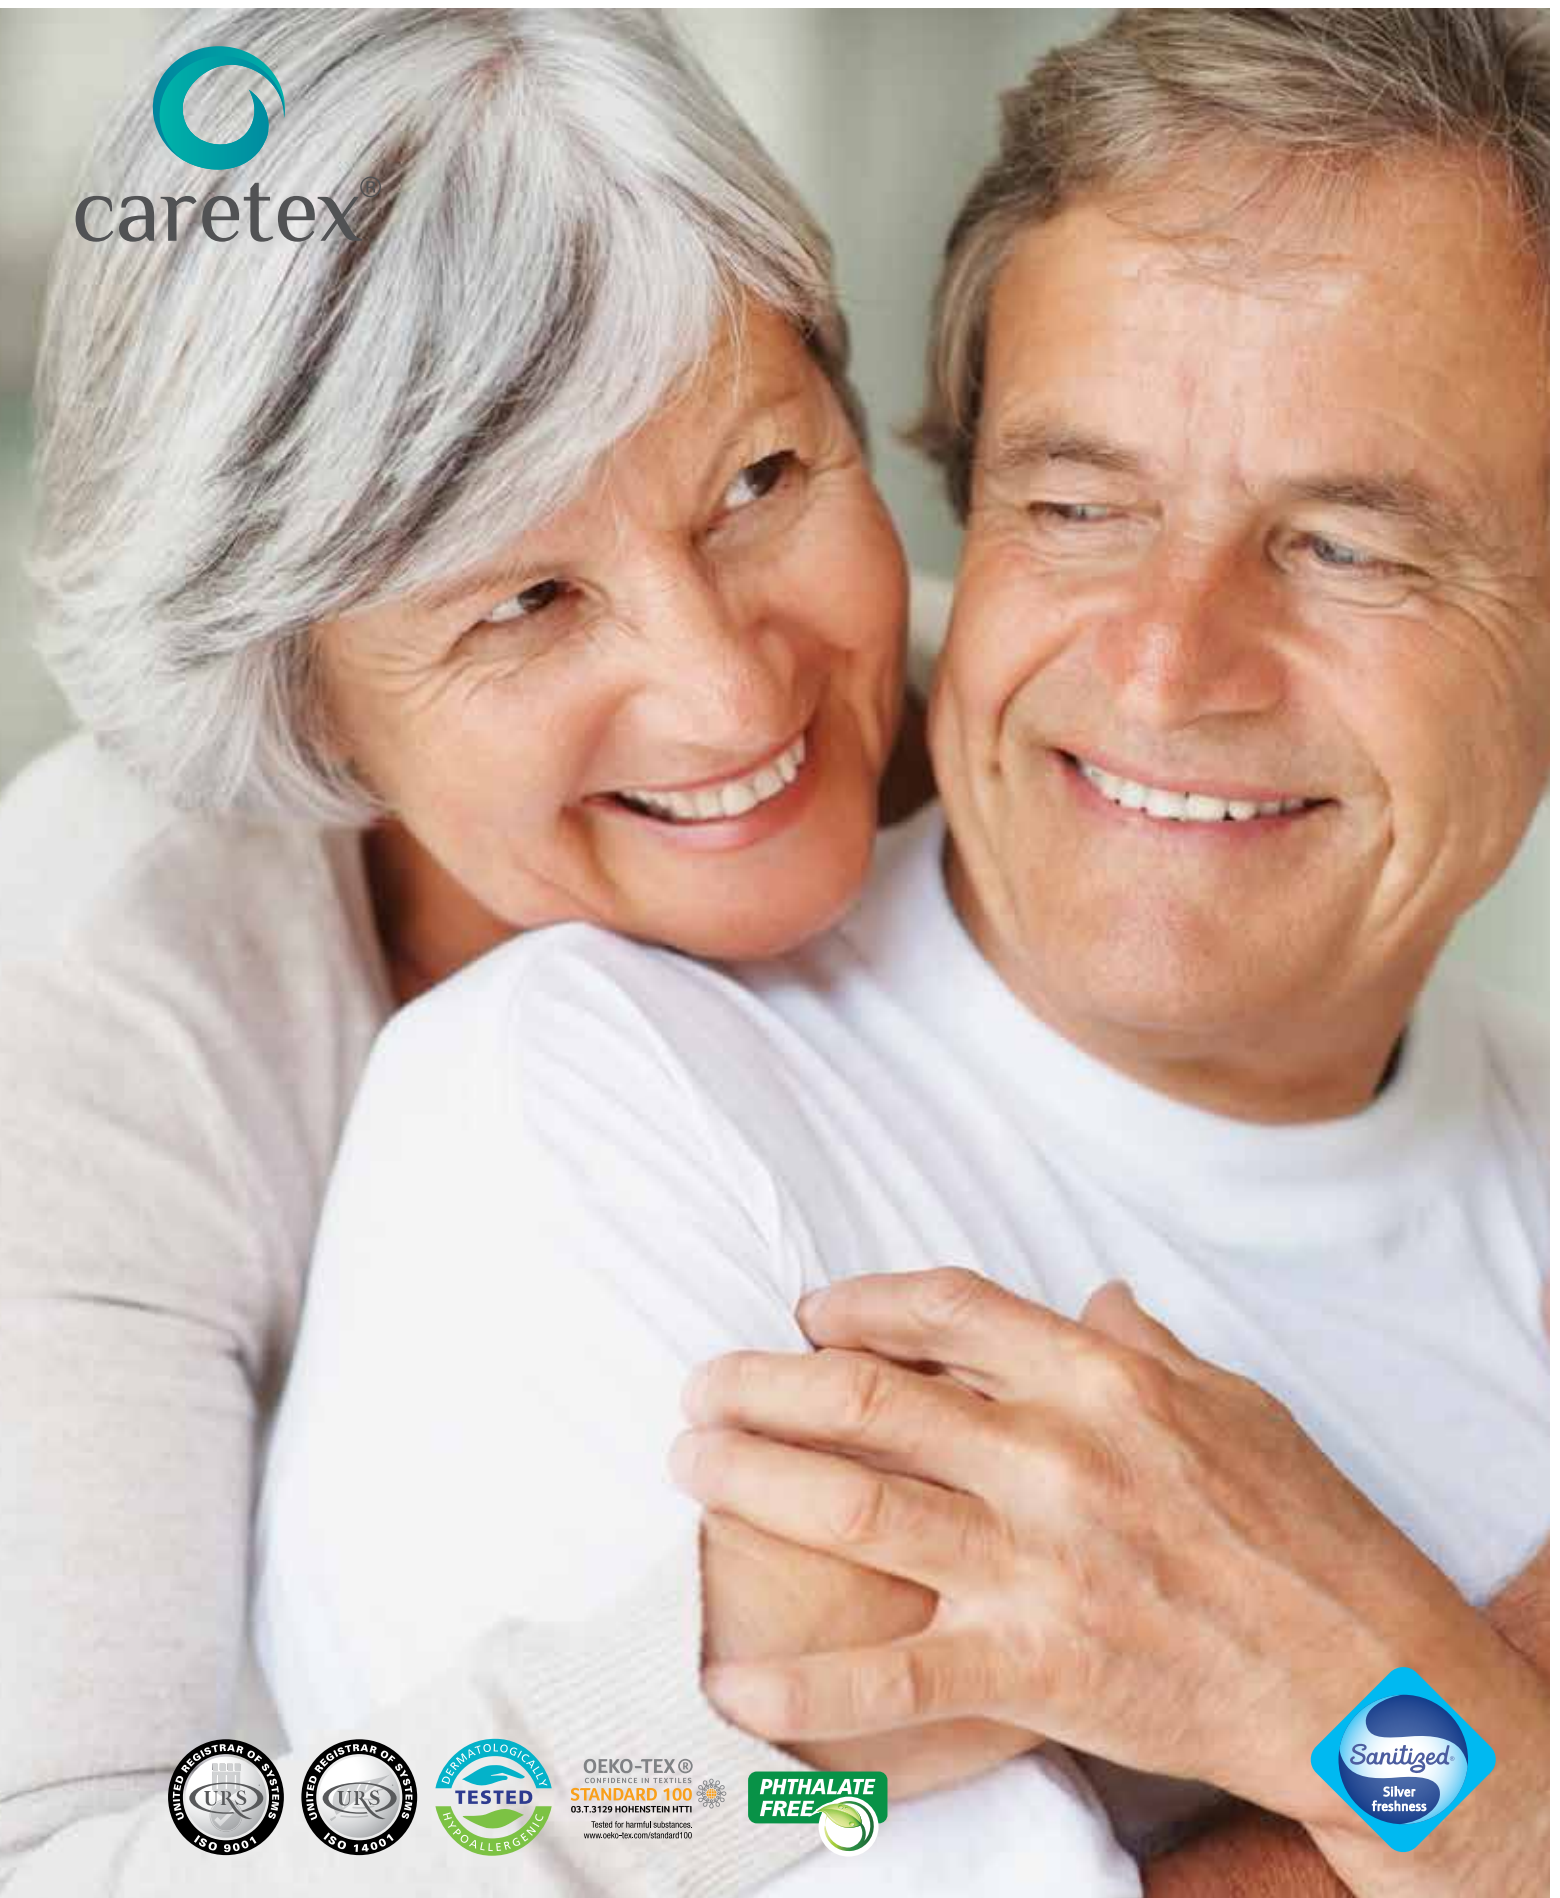

ABSO SLIDE & CARESS SLIDE IS ENGINEERED TO MOVE IN ALL DIRECTIONS, PERMITTING EASY MOVEMENT OF THE PATIENT.

Special products make life easier

WHEELCHAIR ACCESSORIES

Caretex offers functional wheelchair accessories specifically designed to provide a better life quality for disabled people who use wheelchair.

+ NON SLIP CHAIR PAD

The postural disorders of disabled people, resulting from sliding forwards from their seat, can cause back and waist pain and often lead to more serious injuries.

This problem usually brings similar challenges for the relatives and caregivers of the disabled.

As a result of uncontrolled and frequent challenging of the waist and back throughout the day, experiencing problems such as herniated disc and slipped disc are inevitable for caregivers in long term care.

Slide & Lock Non Slip Chair Pad, is the most practical and safest solution for the recovery of a disabled person on the chair without taking help from others. Its cutting edge design prevents the re-sliding.

The one way moving system of Slide & Lock facilitates the backwards movement and prevents sliding forward again.

Slide & Lock, ensures a comfortable seating position with its padded and breathable surface minimizing perspiration. It retains its padded and comfortable form after many hours in use.

Slide & Lock is a great aid to keep a safe and healthy sitting posture at all times

PRECISION+
OPERATION GOWN

Designed For Precise Surgeons

OPERATION GOWN

PRECISION 
OPERATION GOWN

BREATHABLE

LIQUIDPROOF

ANTI STATIC

AUTOCLAVE

ANTI BACTERIAL

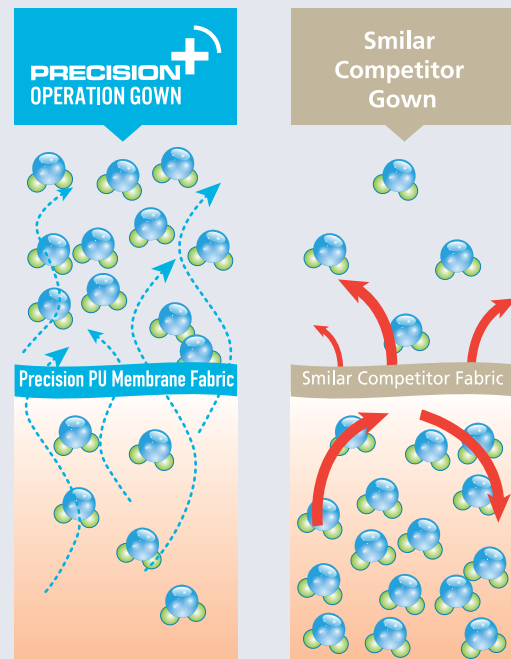

Precision™ OP-Gown is offering a stress free and safe working conditions for surgeons. The gown is antistatic due to the silver yarn used in manufacturing process. There are three layers of sandwich lamination with a highly breathable and heat resistant polyurethane membrane, therefore the gown is permanently and totally liquid proof. Highly breathable PU membrane does not allow perspiration.

Precision™ Medical Gown is designed to withstand heavy industrial washing cycles and therefore can be used many times.

Outside the gown,
Water vapor releases

PROACTIVE MEMBRANE TECHNOLOGY
Layer attracts moisture and turns
it into water vapor.

Under the gown,
the skin perspires.

+ PRECISE AND FLAWLESS AS PRECISE SURGEONS

We are aware of how precise and stressful surgeons' job are. We have specifically designed Precision Operation Gown to take surgeons through long lasting and demanding operations with comfort and safety. We take care of surgeons while they are taking care of others.

+ RELAXING AND STRESS FREE

100% silver yarns running through the gown eliminate the stress caused by the static electricity during long lasting operations.

+ BREATHABLE

Highly breathable and heat resistant PU membrane does not cause perspiration.

+ SAFETY AND COMFORT

The tri-laminate viral barrier is also breathable and liquid proof. This specially designed protective fabric keeps surgeons safe and dry no matter how long or difficult the surgery is. Antibacterial yarns running through the gown enhance your safety to a higher level.

+ DURABLE AND REUSABLE

Precision operation gown is designed to withstand heavy industrial washing and drying cycles. It is autoclavable and can be used many times. Precision Operation Gown is economical and environment friendly.

TEST ACCORDING TO EN - 13795

AUTOCLAVE

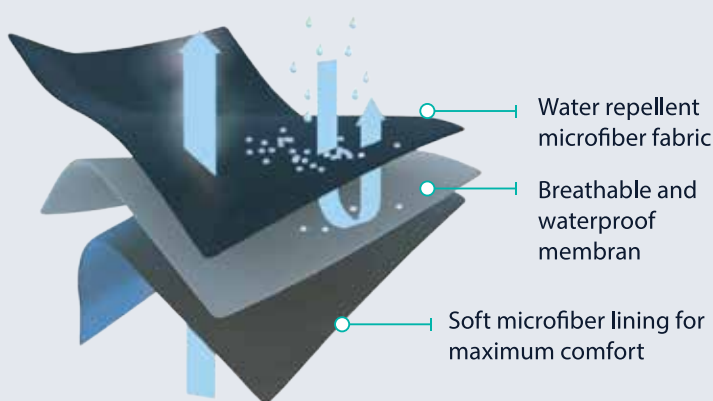

*Helps decrease the risk of heel pressure
Ulcers for long term care patients*

HEEL PROTECTOR

HEEL PRESSURE ULCERS ARE PREVENTABLE

Of all pressure ulcers, 30.3% develop on the heel. Caretex® breathable and waterproof heel protector will help decrease the risk of heel pressure ulcers by eliminating the friction and pressure building during long term care. The breathable and easy to clean surface will stop perspiration; the specially designed soft cushion area inside the protector will minimize pressure building. Due to Caretex® Heel Protector's construction; pressure ulcer risk area will be slightly lifted up to keep away from friction.

Fabric ignited at	8 s	2 min 51 s
Flaming ceased at	4 min 5 s	3 min 54 s
Extent of damage	70 x 200 mm	10 x 200 mm
Flaming debris observed? (YES / NO)	NO	NO
Flaming still in progress 10 minutes after ignition of the crib? (YES / NO)	NO	NO
Extensive combustion (YES / NO)	NO	NO
Flaming combustion (YES / NO)	NO	NO
Progressive smouldering? (YES / NO)	NO	NO
Concealed smouldering? (YES / NO)	NO	NO
Overall result (IGNITION / NON-IGNITION)	NON- IGNITION	NON- IGNITION

EASY WIPE PU ANTIALERGY TEST RESULTS

Test Methods: With Reference to en 14372:2004-Analysis by GC-MS		TR336240
COMPONENT	CAS NO	1
Dibutly Phthalate (DBP)	84-74-2	n.d.
Benzylbutyl Phthalate (BBP)	85-68-7	n.d.
Bis-(2-ethylhexyl) Phthalate (DEHP)	117-81-7	0,006%
Diisononyl Phthalate (DINP)	285553-12-0	n.d.
Di-n-octyl Phthalate (DNOP)	117-84-0	n.d.
Diisodecyl Phthalate (DIDP)	267-61-40-0	n.d.
NOTE(S):	n.d. = not detected * = exceed the limit < = less than Detection Limit = For DBP, BBP,DEHP and DNOP: 0,003%, For DINP, DIDP:0,01% (for individual compound)	

EASY WIPE PU WATER VAPOUR PERMEABILITY TEST RESULTS

Test Methods: Water Vapour Permeability; ISO 11092(*)		1211370
	RESULT	REQUIREMENT
Ret=	1182.125 m ² Pa/W	-

OPERATION GOWNS TEST RESULTS

Antibacterial Activity Test		AATC147-2004
TEST ORGANISM: <i>Staphylococcus aureus</i> (ATCC 6538) INCUBATION TEMPERATURE: 37 C ± 2 °C		INCUBATION PERIOD: 18 - 24 HOURS AGAR MEDIUM: NUTRIENT AGAR
TESTED SPECIMEN	TEST ORGANISM	RESULTS
SAMPLE 1 (25 X 50 mm)	<i>Staphylococcus aureus</i> (ATCC 6538)	NO GROWTH OF <i>Staphylococcus aureus</i> WAS OBSERVED DIRECTLY UNDERNEATH THE TESTED SPECIMEN.
SAMPLE 2 (25 X 50 mm)	<i>Staphylococcus aureus</i> (ATCC 6538)	NO GROWTH OF <i>Staphylococcus aureus</i> WAS OBSERVED DIRECTLY UNDERNEATH THE TESTED SPECIMEN. WIDTH OF CLEAR ZONE OF INHIBITION WAS MORE THAN 31,3mm.

CLEANING INSTRUCTIONS ON EASYWIPE™ PU COATED MATTRESS PROTECTORS

PRODUCT NAME	ACTIVE COMPONENT	CONC.	RESULT (Short Contact)	RESULT (Long Contact)
Chlor-Clean Tablets	troclosene sodium anhydrous	1000 ppm (1 tablet / 1 liter water)	OK	OK (possibly discolor of the PU)
Dettol	chloroxylenol	5%	OK	OK
Ethanol 70%	ethanol	70%	OK	OK (material starts to wrinkle+resistance PU-surface slightly decreased)
Formaldehyde	-	30%	OK	OK
Hansamed (spray)	chlorhexidin-digluconas 1%	pure	OK	OK
Haz-Tabs	natriumdichloride	1000 ppm	OK	OK
Haz-Tabs	natriumdichloride	10.000 ppm	OK	not OK (discolor of the PU)
Hibicet	chlorhexidin-digluconate	pure	OK	OK
Incidin Plus	glocoprotamine	2%	OK	OK
Isopropylalcohol	isopropanol 70%	pure	not OK (material starts to wrinkle+resistance PU- surface decreased)	not OK (material starts to wrinkle+resistance PU- surface decreased)
Jodtinktur	jodium-kaliumjodine-ethanol	pure	not OK (discolor of the PU)	not OK (discolor of the PU)

Kodan Tinktur Forte	hydroperoxide-solution 30%	pure	OK (resistance PU-surface slightly decreased)	OK (resistance PU-surface slightly decreased)
Natriumhypochlorite	active chlorine	3%	not OK (discolor of the PU+resistance PU-surface decreased)	not OK (discolor of the PU+resistance PU-surface heavily decreased)
		0.3%	OK (resistance PU-surface slightly decreased)	not OK (discolor of the PU+resistance PU-surface decreased)
Octenisept (spray)	-	pure	OK	OK (resistance PU-surface slightly decreased)
P3-Topaxx 66	sodium hypochloride + hydroxide	5%	OK	OK (material starts to wrinkle+possibly discolor of the PU))
Sagrotan (spray)	-	pure	OK	OK
Sanit P20	mono-ethanol amina	pure	OK	OK
Sagrotan Med (spray)	alkylhydroxypolyoxylene	pure	OK (material starts to wrinkle)	OK (material starts to wrinkle+resistance PU-surface slightly decreased)
Softasept N (spray)	ethanol-propanol	pure	OK (material starts to wrinkle)	OK (material starts to wrinkle)
Spring	glycoether-alcohol	pure	OK	OK
Sterillum	glycoether 85% etradecanol	pure	OK (material starts to wrinkle)	OK (material starts to wrinkle+resistance PU-surface slightly decreased)
Suma Bac D10	ammoniumchloride	1%	OK	OK
Surfa'Safe	didecyldimethylamoniumchloride	pure	OK	OK
Topaxx 421	sodium hypochloride +hydroxide	5%	OK	OK (material starts to wrinkle)
Virkon	potassium prexomonosulphate	10g/l	OK	OK
Volvone	ammonia	40%	OK	OK

Customize Your Own Products to Meet Your Individual Needs.

TAILOR MADE PRODUCTION

In addition to our wide range of products, we also offer the option of custom made production, based on our customers' own preferences for their individual needs.

Please contact us for more information about custom made production in each product category.

GENTUĞ
*Enhanced Technical Textile
Solutions*

We Transform The Needs To Satisfaction.

Quality Policy and Certificates

With the mission of providing enhanced technical textile solutions to our customers' needs, we always keep trying to improve the total quality of business that transforms the needs to satisfaction.

This is our main quality standard which can be achieved by only having full customer satisfaction.

ENHANCED TECHNICAL TEXTILE SOLUTIONS
for your business and for your life...
